1. Referenced requirements wish to establish whether or not there is any evidence of the supposed refineries being constructed in the given areas. If there is evidence of the construction, indicate whether it is of current activity or of past activity only.

2. Examination of current photography indicated that no petroleum refineries were observed in the areas of coordinates given. Industrial construction in early stages was observed at many of these locations but could not be identified as petroleum refinery construction.

3. These requirements are considered to be complete as of the date of this memorandum. The photo analyst on this project was [redacted] who may be contacted on extension [redacted] should you have further questions regarding this project.
